### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Xu Hong on 3/4/2004.

The application has been amended as follows:

Change the title of the invention to:

Treatment Liquid for Cured Unsaturated Polyester Resin and Treatment Method Thereof.

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

During prosecution of this application and in the first office action on the merits, the examiner did apply prior art that disclosed decomposition of PET, wherein PET is thermoplastic polyester. The applicants were correct in pointing that out and stating that the prior art of record did not teach cured unsaturated polyester. In view of the above amendment, completely new search have been conducted in order to give the applicants proper examination of the pending claims.

During the search three documents were found US 5,420,166 to TUFTS, US 5,559,159 to SUBLETT and US 5,776,989 to KUBOTA. All disclosed decomposition of cured unsaturated polyester in organic solvent such as amines, alcohols or glycols. However; none of the found disclosures taught, suggested or otherwise disclosed use of compound having phosphoric acid structure.

The prior art of BARKEY that was applied against present claims did teach use of phosphoric compounds in the decomposition of the polyester, however the polyester of BARKEY is also thermoplastic PET. There is no motivation for one having ordinary skill in the art to apply the process of BARKEY to cured unsaturated polyester, since cured unsaturated polyester is materially different from thermoplastic polyester. In view of the above discussion pending claims are passed to issue.
